

Scraper recovery & remaining backlog

Updated September 18, 2026 | Replaces the original cannot-scrape status snapshot

Verified new boards	University-related boards	Regression suites	Admin blocks preserved
327	59	75 / 75 passed	38 unchanged

What changed

Tata Consultancy Services (TCS) is registered in the live scraper. Public source support was added for TCS, TikTok, Siemens / Siemens Energy, ApplicantPro / isolved, PageUp, University of Michigan, University of Kansas, Taleo and SchoolJobs. Employer-account resolution and university pagination were also improved.

Every new board was validated before registration, checked against the live admin blocklist, and read back after the write. Registered sources will be used by the scheduled scraper; this does not assert that every posting has already been ingested or scored.

How to read this report

Part 1 lists all 327 new board registrations with clickable job-portal links. Part 2 retains all 2,975 original employer rows with updated dispositions. Some original rows are aliases of one employer: 334 original rows map to the 327 additions. Another 22 rows are already configured, and 11 original rows are explicitly blocked.

The remaining 2,608 original rows still need work. A saved search lead or readable endpoint is not an approved employer match. Ambiguous names, unrelated parent-company boards, internal employee portals and incomplete listings were held. Links in unresolved rows are discovery leads unless their status says Added and verified or Already configured.

Known follow-up: the company directory still exceeds its 5% Unsorted-sector threshold (28.7%, versus 28.1% before this work). The 42 prominent-company category warnings were fixed. The remaining categorization work does not change which boards were registered.

Status of the original 2,975 rows

Disposition	Original rows
Further adapter investigation required	936
Search leads saved - validation pending	928
Added and verified	334
Readable - identity review pending	268
Public portal restricted during check	95
Adapter validation unresolved	86
Fetch failed during check	83
Provided URL unavailable	81
Held for identity or scope review	74
University follow-up required	52
Already configured	22
Blocked - unchanged	11
Partial listing - further work required	3
No official portal confirmed	2

The original PDF is preserved beside the updated copy with an ORIGINAL suffix. Companion CSVs contain full URLs and detailed follow-up notes without shortening.

Part 1 - 327 added boards

All entries below were written to the live registry and verified by readback. Public rows read are source postings, not the number of jobs matching your personal filters.
